COSC 1336 – Programming Fundamentals I
Program 2 - Arithmetic Expressions

Write a program that gets five test scores from the user, calculates their average, and prints it on the screen. Test your program with the following data:

Run 1: 40, 80, 97, 32, 87
Run 2: 60, 90, 100, 99, 95

Run your program and copy and paste the output to a file. Create a folder named, **fullname_program2**. Copy your source code and the output file to the folder. Zip the folder and upload it to Blackboard.
